

Aquatec Maxcon has an extensive track record in working with the Industrial and Food and Beverage industries to implement leading technologies to achieve world's best practice. From reducing trade waste costs to resource recovery of water, biogas and nutrients, our specialty is in anaerobic treatment and water recycling.

Aquatec Maxcon understands the specific needs of these industries to help customers reach their goals by providing tailored water treatment solutions within budget, by application of leading technologies from across our extensive range.

Please refer to the following projects for a sample of successful industrial process plants completed by Aquatec Maxcon.

 <u>Castlemaine Perkins WRP</u>	 <u>Visy Paper Anaerobic Plant</u>
 <u>Smiths Water Re-Use Plant</u>	 <u>Tooheys WWTP</u>
